

WHY LET YOUR MONEY WALK OUT THE DOOR?

Kaimi Brings Your Data Together

(KYE-EE-MEE)
THE SEEKER OF
KNOWLEDGE

Kaimi is a solutions package from 21CSI that prevents your revenue from being stolen. Kaimi uses the full power of your data to find cheaters, thieves, and comp abusers. Using proven methods of pattern matching, data analysis and intuitive user interfaces, Kaimi gives you information when you need in the way you need it.

The Kaimi Solution Provides

- » Solid enterprise solutions and expert technical experience extract the most value out of your current data
- » More than 20 years software solutions experience and 30 years in the casino surveillance industry
- » Custom solutions for your needs

STOP LOSS BEFORE IT HAPPENS!

It's estimated that 5%-to-7% of a casino's gross revenue is lost to scams. Even with safeguards like gamer tracking systems and digital scans over every square inch of the gaming floor, loss prevention depends on making sense of the data. Our Kaimi product line collects and analyzes critical information from both internal databases and available public records to reduce unnecessary losses.

21CSI, a leader in intelligence software for the US military, applies the same expertise to domestic problems. Working with selected partners in the gaming industry, 21CSI is applying technology to effectively improve loss detection.

21CSI develops decision support systems to help manage complex, high-stress, rapidly changing environments through sound, computer-assisted data monitoring and decision making. Embedded intelligent agents enable the systems to adapt, respond, and learn for each new challenge.

21ST CENTURY SYSTEMS, INC.

21CSI is dedicated to
Data Driven Decisionmaking[™]

YOU DON'T HAVE TO TAKE CHANCES.

Start Using Kaimi Quickly

The Kaimi solution benefits staff quickly with no need for expensive training, lost work time or specialized equipment. Combine information from private databases and public search engines to find patterns and suspicious play.

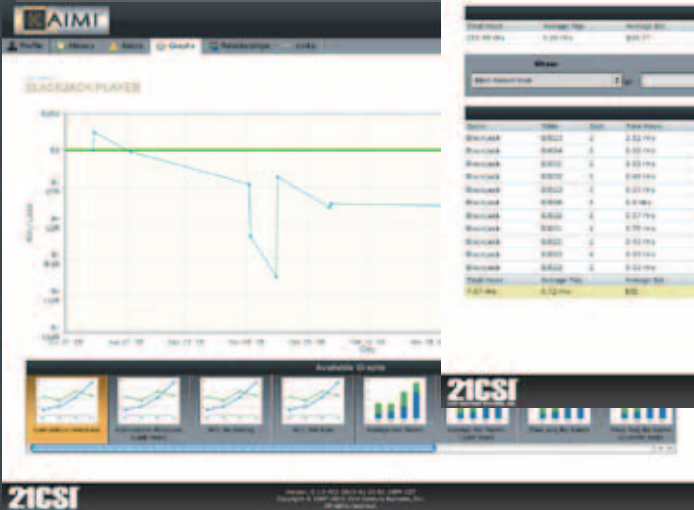

Research People Easily

Let your staff focus on the job of preventing cheaters from walking away with your money. Kaimi presents them with the information they need to make good judgments about who is cheating, who is skilled, and who is lucky.

Get Alerts Automatically

With customized automated alerts, staff are notified where it makes sense - at the console, by email, or on their mobile device - to act on the information and prevent loss.
